

NEW JERSEY DEPARTMENT OF TRANSPORTATION

**Route 46 and Route 19/CR 509/Broad Street
Drainage Improvements
City of Clifton, Passaic County**

**Pre-Construction Public Information Center
Wednesday, July 8, 2015, 6:00 – 8:00 pm**

The New Jersey Department of Transportation (NJDOT) committed to developing transportation improvements that best balance the transportation needs, the environment, community concerns and cost, will hold a **Pre-Construction Public Information Center for the proposed drainage improvements to Route 46 (from Grove Street to Broad Street) and Route 19/ CR 509/ Broad Street (from Colfax Avenue to Weasel Brook)**. You are encouraged to actively participate by providing comments at the meeting, by mail, or by e-mail.

The Meeting

The Public Information Center will be held on **Wednesday, July 8, 2015 from 6:00 – 8:00 pm at the Clifton City Hall, 900 Clifton Avenue, Clifton**. Please come at a time that is convenient for you. You will have an opportunity to review exhibits of the proposed project, ask questions and discuss issues with representatives of NJDOT.

The Proposed Project

NJDOT proposes to:

- (1) Construct new drainage collection systems (inlets/ manholes/ piping) along Route 46 and along Route 19/ CR 509/ Broad Street;
- (2) Construct a stormwater control detention basin within the loop ramp from Route 46 WB to Route 19 SB;
- (3) Construct a new stormwater outfall to Weasel Brook through the existing concrete retaining wall; and
- (4) Repair/replace Weasel Brook concrete floor and walls that are in poor condition in the vicinity of the proposed stormwater outfall.

Traffic Control/Detour

A majority of the construction will be completed at night between the hours of 8:00 PM to 6:00 AM the following morning. During this time period, temporary lane closures will be implemented on Route 46 and Broad Street/Route 19 to allow sufficient area to construct the drainage improvements. At least one lane of traffic in each direction will be maintained on these roadways during the overnight construction. No lane closures will be permitted during the daytime hours. Night detours (approximately 6 nights in total) will be required for some ramp movements when construction of the new pipes crosses a ramp. These short duration detours will only be in effect during the night-time working hours. No detours will be permitted during the daytime hours. Streets to be used for these detours are: Van Houten Avenue and Broad Street, which are county roadways and Kathryn Street, which is a city roadway.

Estimated Construction Schedule

Begin	July 2015
Anticipated Completion	May 2016
